

improve safety and efficiency, reduce noise and protect health

Armorgard's CuttingStation; your
best practice solution for cutting on site

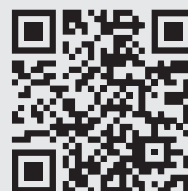

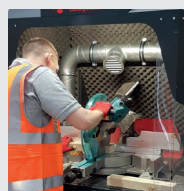

Choose the ultimate protection for your workers

the extraction unit SS7X

Introducing our **new powerful dust management unit** to control dust and fumes. The SS7X protects operators and those around them by **dramatically reducing the risk** of dangerous airborne respirable dust and fumes. Fast becoming an **essential safety product** for construction projects, building refurbishments and dry-lining.

- H-class filtration processes dangerous dust from within the cutting zone
- Processing 1000 cubic meters of air per hour to rapidly reduce airborne dust
- Protects the operator and others working in the room from exposure to long-term health risks
